

SERVICE CLUB ACADEMY

Watch for pedestrians at the crosswalk.

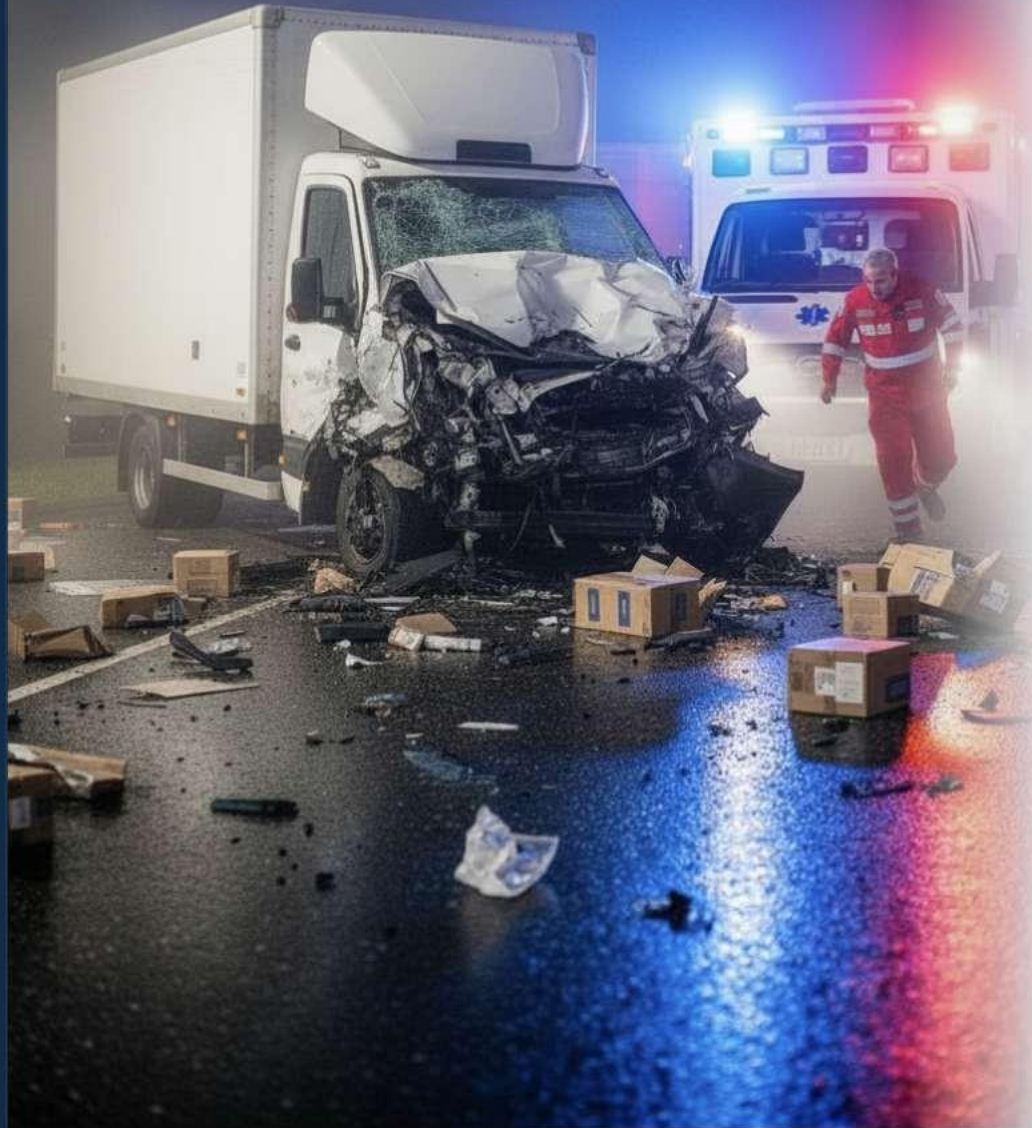

Maintain a safe following distance.

VR, AI, and on-the-road **driver training**: The magic blend for 60% fewer incidents.

Fully Customisable Blended Training.

One untrained driver can cost more than a vehicle.

FLEET DAMAGE

One mistake, one vehicle wrecked, your brand reputation shattered.

INSURANCE SPIKE

Rates climb when risks aren't managed. Every crash costs you more.

SAFETY FAILURE

A preventable error can become a headline.

DRIVERS LOST

They quit. They don't stay. They don't deliver your brand promise.

UNMET TARGETS

Lost drivers mean undelivered goods, falling behind targets and lost revenue.

\$ Vehicle & Property Damage

+49%

Increase in body repair costs

\$4,700

Average cost per crash

- Collisions damage vehicles, break customer trust, and disrupt delivery schedules—harming your reputation and bottom line.
- Body repair costs have risen by 49% over the past decade.
- Crashes cost employers an average of \$4,700 per incident.

⚠ Rising Insurance Cost

Insurance rates rise up to **49%** after a crash

- Insurance rates rise up to **49%** after a crash.
- Higher premiums **last 3–5 years post-incident.**
- Companies with trained drivers pay less in claims, premiums, and business disruption.

Fatal Accidents

40%

of work-related deaths involve driving

1,252

workers died in crashes in 2023

- Road crashes responsible for 40% of all work-related deaths.
- In 2023, 1,252 workers died in road incidents (NSC).
- One incident can change everything. Our programme helps drivers recognise and react before it's too late.

Legal and Compliance

- ⚖️ Are your Contractors treated like employees? That's an audit penalty waiting to happen.
- 📄 Different providers, different content. No defensible, standardised baseline.
- 📋 No real-time proof of training means there is no way to demonstrate due diligence.
- ⚠️ Are you manually tracking your systems? One missed certificate, one unchecked driver, and your liability spikes.

AI RIDE-ALONG — EXECUTIVE SUMMARY

The Intelligence Layer: 360° Immersive Training Framework

Our Intelligence Layer represents the pinnacle of training architecture, synthesising proprietary AI, environmental logic, and biometric analytics into the most sophisticated 360° framework on the market. We have engineered this stack to move beyond traditional learning, leveraging our deep domain expertise to deliver a high-performance technology that is unmatched in its technical precision and security.

 360 immersive experience	 No Code CMS Dashboard	 Language support
 DSP Control and Administration	 Certificate Access & Verification	 Tamper-Proof Audit Trail
 Voice-Stress Analysis	 Gamification	 Scenario modification
 KYC Check (Biometric Check-In)	 Engagement gates	 Direct Course Assignment
 Performance Reporting & Analytics	 Behaviour assessment	 The "Hazard Perception" Heatmap
 Randomised "Proof of Life"	 LMS ready to integrate with API	 AI Agent (AI Training Assistant)
 Adaptive pacing	 Real-Time Progress Monitoring	 Offline-Sync Capability
 Experiential feedback	 Environmental Logic	 GDPR Compliance

VIRTUAL REALITY TRAINING

Full VR That Travels To Every Driver

A blended training solution combining real-world driving with fully immersive 360° VR — portable, standardised and proven to outperform traditional simulation on every metric that matters.

WHY SERVICE CLUB VR

**Full VR with 3D Images**
True 360° immersion with hand tracking and real-time interaction.

**Rich Interactions**
Trainees actively perform tasks — they don't just watch.

**Accessibility**
Headsets travel to any classroom, depot or warehouse.

**Limitless Scalability**
Roll out the same training across every working location.

**Muscle Memory**
Repeated practice builds reflexes that last on the road.

**Standardised Training**
Every driver receives the exact same high-quality experience.

**Behavioural Data**
Capture how each driver reacts, decides and improves.

**CLICK TO PLAY**
Watch VR demo & Amazon staff's reaction

YOUR ROI

4x More Focused

80% Information Retention

40% Spatial Improvement

43% Safer Conditions

38% Faster Tasks

54% Training Time Saved

76% Accident Reduction

THE FULL DRIVER JOURNEY, SIMULATED

**STEP 01**
Finding the parcel

**STEP 02**
Leaving the warehouse

**STEP 03**
Driving to destination

**STEP 04**
Using the app

**STEP 05**
Delivering the parcel

**STEP 06**
Angry dog encounter

**STEP 07**
Angry customer

**STEP 08**
Angry police officer

TRADITIONAL SIMULATION VS VIRTUAL REALITY

2D / 3D content — non-immersive or only semi-immersive.

Multiple screens or heavy equipment for a vague simulation.

Costly to scale — UPS took 10 years to reach 9 locations.

Limited group size due to bulky, expensive rigs.

→ 3D fully immersive Virtual Reality. No contest.

→ Small, portable headsets that drop the trainee into any environment.

→ We scale the same training to all of your working locations.

→ Up to 30 drivers trained at a time in a single classroom.

"They are far more than a software vendor; they are a strategic extension of our logistics ecosystem for driver acquisition and training."

SERVICE CLUB

BEHIND THE WHEEL

Expert-led, practical instruction that turns theory into life-saving road skills — delivered by a global network of elite trainers.

65%
Reduction in At-Fault Incidents

72%
Improvement in Hazard Response Latency

#1
cause of job loss tackled: vehicle damage

EXPERT-LED AT SCALE
Standardised Global Training

- 10,000+** certified instructors worldwide
- 7,000+** partner driving schools
- 500+** locations under one Master Vendor model

Every module and activity is pre-approved—ensuring identical quality from Florida to Hawaii, London to Cornwall, Berlin to Frankfurt, and Mumbai to Delhi. Our localised audit protocols and spot-checks guarantee this standard is enforced globally.

LOCAL-FIRST INFRASTRUCTURE
Schools Within Reach

- 10-mile** radius from each driver's station
- Heatmaps** align schools with driver density
- Less** travel time & operational downtime

Massive in scale, microscopic in local reach — drivers get trained where they actually work.

PERSONALISED COACHING
Small-Group, 1-on-1 Feedback

- 3 drivers** per vehicle, per session
- 1-on-1** feedback on individual performance gaps
- Real roads** high-stakes, real-world environments

Intensive, hands-on coaching on actual delivery routes — not parking lots.

CRITICAL RISK AREAS
Targeting What Causes Crashes

- COAST** Concentration · Observation · Anticipation · Space · Time
- Low-speed** manoeuvres, reversing & spatial awareness
- Hazards** silent EVs · weather · vulnerable road users

Explicitly targets the #1 cause of driver job loss — repeated vehicle damage — and the leading causes of road fatalities.

BEHIND THE WHEEL — STANDARDISED, LOCAL, PERSONALISED & RISK-TARGETED COACHING

"They are far more than a software vendor; they are a strategic extension of our logistics ecosystem for driver acquisition and training."

IN-PERSON CLASSROOM

Fully engaging content and instructor led training method

-  **EXPERT INSTRUCTORS**
Drivers interact directly with expert instructors
-  **INTERACTIVE SESSIONS**
Structured, interactive learning sessions
-  **REAL-WORLD FOCUS**
Core driver training and real-world discussions

FACILITIES

-  **Driving Fields:** Dedicated areas for practical assessments and "Behind the Wheel" training.
-  **Classrooms:** Covered spaces equipped with projectors and seating for foundational theory instruction.
-  **Operational Essentials:** Toilets, Wi-Fi, cleaning services, phone charging units, and weather protection.
-  **Safety Gear & Signage:** All sites have appropriate signalling, cones, posters, and signage at the entrance.
-  **Tech Tools & Gadgets:** Virtual Reality headsets, tablets for e-learning, AI tools for instant help.

INSTRUCTOR-LED VIRTUAL

Immersive training with scenario based questions

-  **EXPERT-LED ONLINE**
Expert-led lessons conducted online
-  **SCENARIO-BASED**
Scenario-based, interactive learning
-  **SCALABLE & REMOTE**
Accessible and scalable for remote teams

RESPONSE PLAN**

Beyond completion: see how every driver actually performs.

Track the headline numbers — drivers trained, scores, durations and completion rates — in one clean dashboard.

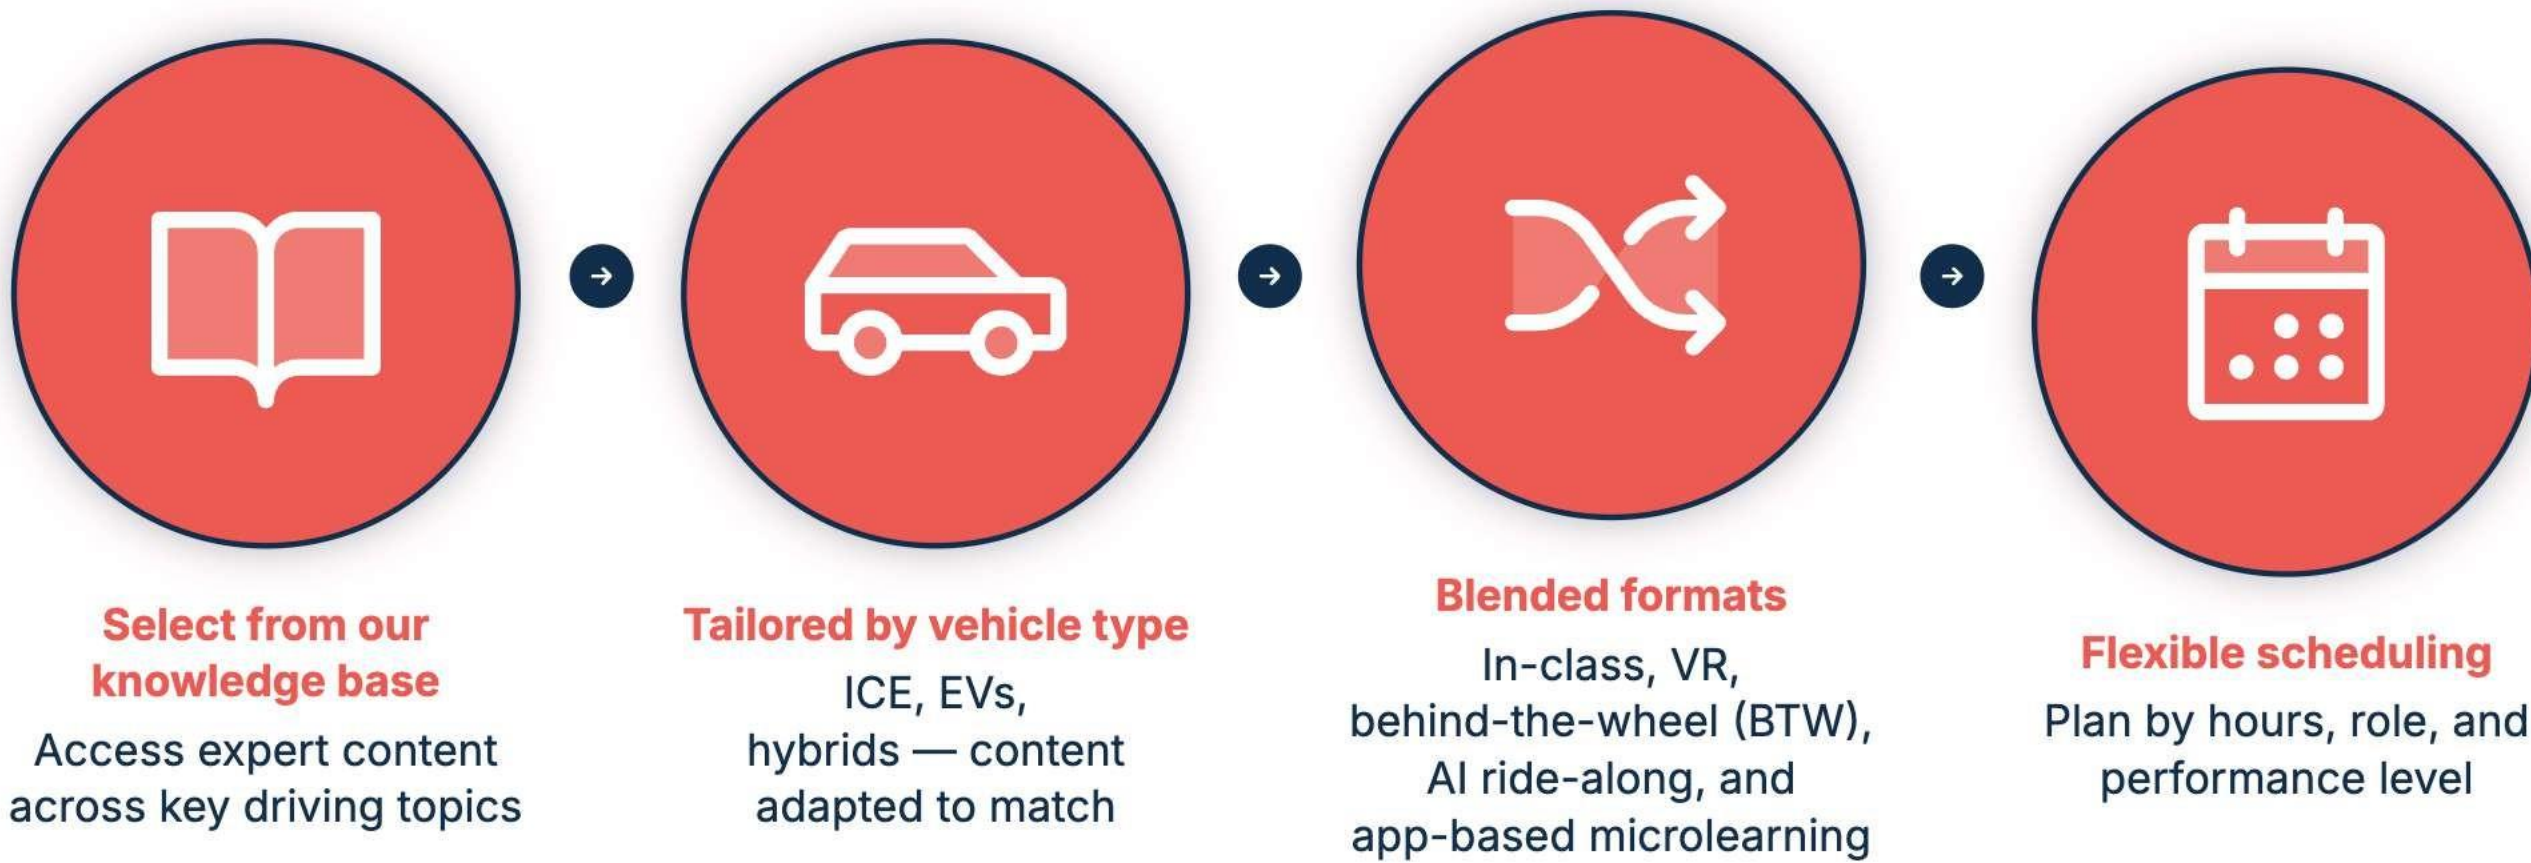

Then drill down into granular per-module metrics: **Accuracy, Initiative, Knowledge, Reaction Time** and **Spatial Awareness**, broken down by suite, subject and attempt.

Spot who's mastering the material and who needs another pass — long before it shows up on the road.
