The **drivers** you're looking
for are here.

Qualified.

Verified.

Ready to roll.

THE PROBLEM IN THE LOGISTICS INDUSTRY

THE PROMISE

Anyone with a license and legs can do the job. No training. No barriers.

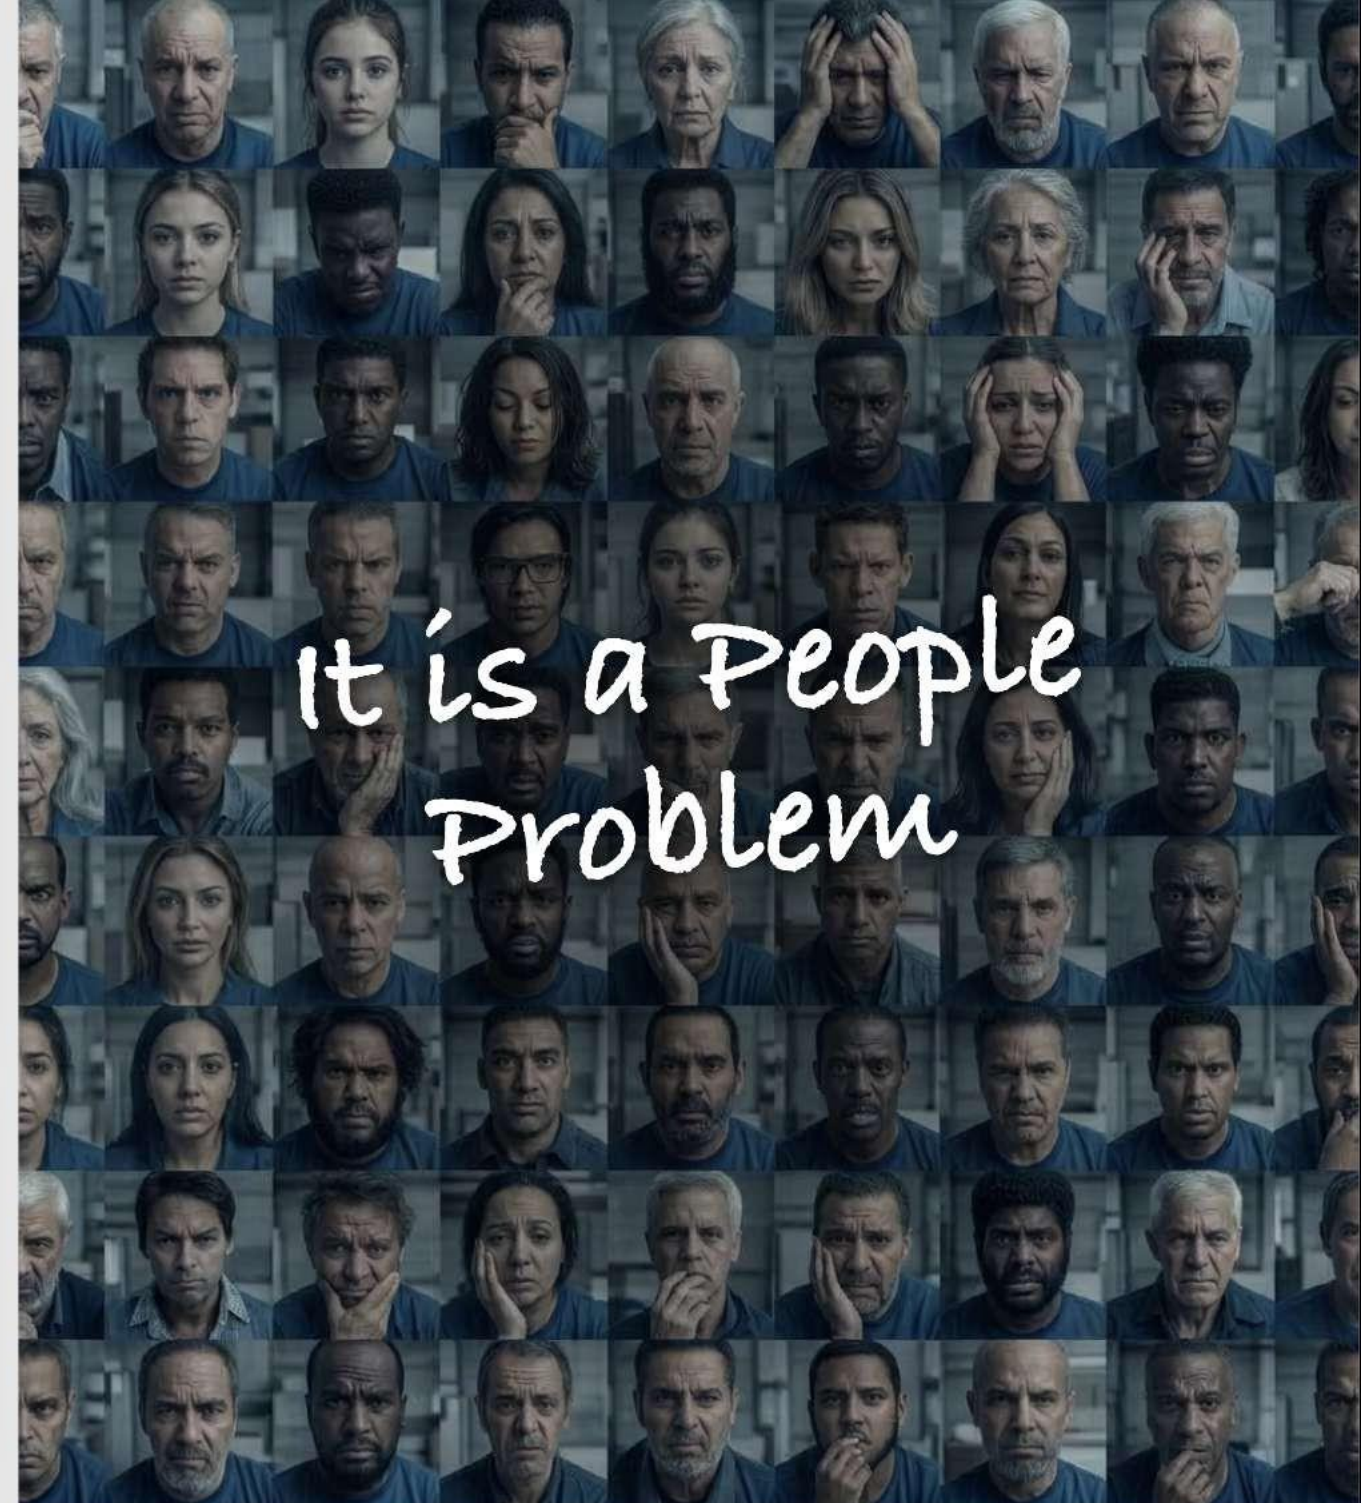

THE REALITY

Drivers are expected to know safety rules, navigate cities, protect your brand, avoid fines, meet strict deadlines, and stay compliant — all without an effective onboarding.

THE COST

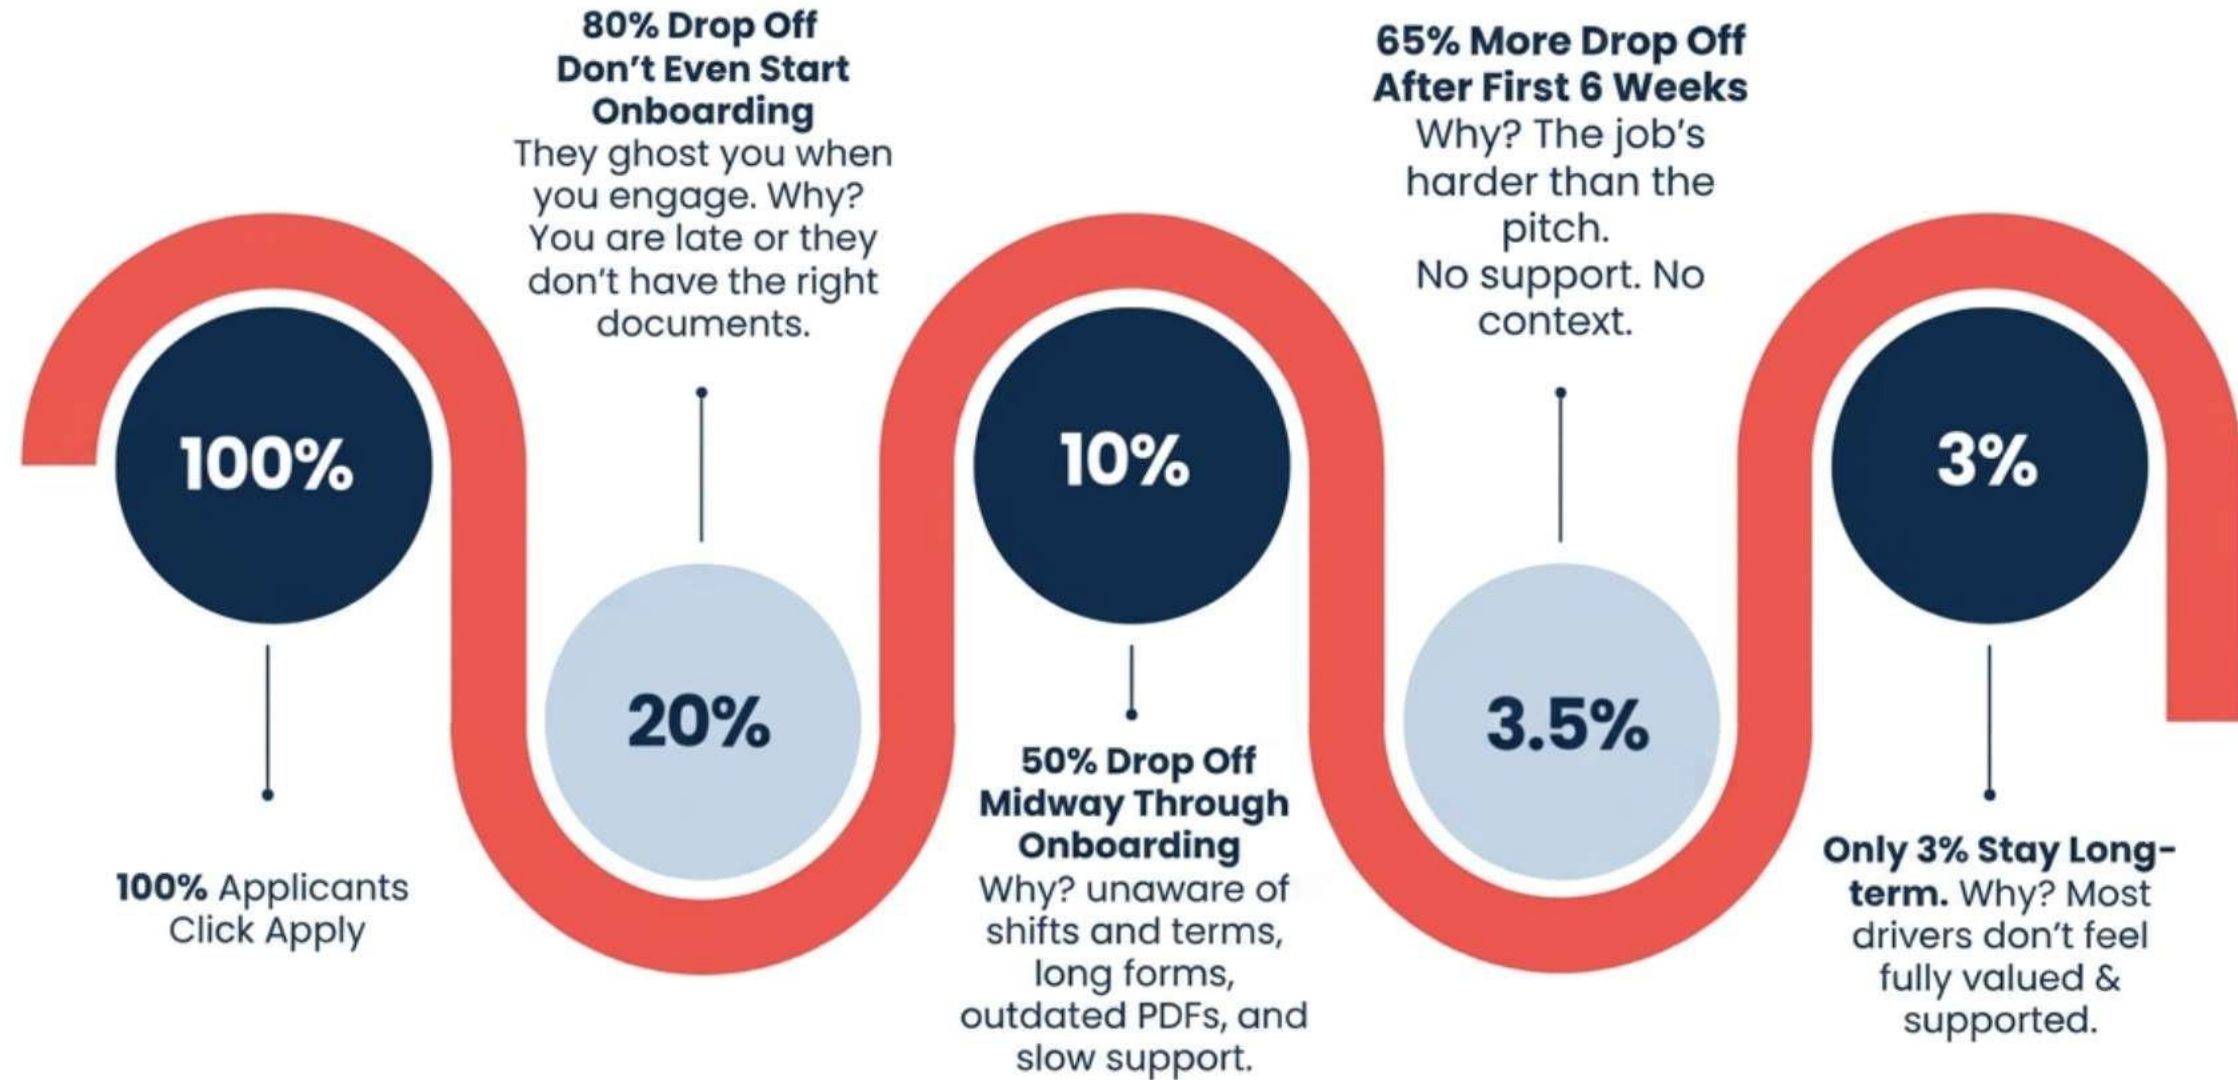

High churn. High risk. No paper trail. And you're still accountable.

TECH

We created a state-of-art technology that **converts applicants to actual drivers x4 better than the industry standards** and through API integration, we are able to move them to your platform seamlessly.

GLOBAL ACCOUNT MANAGERS

Our Global Account Managers will **work closely with you to analyse your needs and meet your targets.** Daily and weekly meetings are possible depending on your volume needs. Instant access to your Account Managers is also possible through Slack channels.

CALL CENTRE

An army of carefully trained and closely monitored call centre agents are assigned to each client's needs; while the tech is doing its magic with genius automations and Artificial Intelligence, good old "humans" will still be making hundreds of calls to the applicants to give that final push towards conversions.

To sum up, we got you covered on all fronts.

"They are far more than a software vendor; they are a strategic extension of our logistics ecosystem for driver acquisition and training."

A light blue world map is centered on a dark blue background. Red circular markers of varying sizes are placed across the map to indicate specific locations. Notable markers include a large one in Mexico, several in South America (primarily Brazil), a cluster in Africa (West and Central), a large one in India, and several in Southeast Asia and the Pacific region. A few smaller markers are also visible in Europe and Asia.
